

Be-Tech Smart Deadbolt

- Motorized deadbolt
- Auto Locking
- Scramble code

Easy Access
Leading Keyless Solutions Since 1992

Sharing and Convenient

You can share code with friends and guests valid for a few weeks, hours, or minutes, and revoke them whenever you need to. Never worry about lost, stolen or copied keys again.

Various access

There are smart phone, PIN code, fingerprint, mechanical key for your choice. (Smart phone unlocking is base on adding WIFI module)

Mute function

Turn on or turn off the beep sound is up to your decision.

Scramble code

When your friends or other people go home with you, scramble code supports you enter random digits before or after the correct access code.

Auto locking

Enable the auto lock function, it will lock automatically after 4 seconds by default. You also can set your auto lock time between 3 and 30 seconds if necessary.

WIFI module for IOT use

Comes with the Connect Wi-Fi module (TUYA) so there's no additional hubs needed and it works off your home Wi-Fi.

Lock/unlock button

Press Lock/Unlock button on the back body to lock/unlock the lock inside the room Optional.

Locks monitoring

View your lock history, see a list of users, their assigned codes, and each entry time. Get real-time alerts when someone accesses your home.

USB battery back-Up

The lock can be energized with a power backup when you forget to replace the batteries.

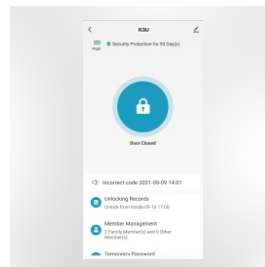

Remote unlocking

Unlock your door anywhere, never keep a visitor waiting outside the door anymore.

Mechanical key override

For emergency, it can also be unlocked with a mechanical key.
