8256 Series

TT Electronic Lock

Ideal for small and medium-sized hotels and apartments, the electronic Lock allows centralized room management via the TT lock app. Built with a robust and durable lock mortise, it withstands frequent use for long term.

Simple to operate and manage, it comes with a mechanical key as standard and supports multiple access met-ods—fingerprint, password, card, QR code, or combinations to suit diverse needs.

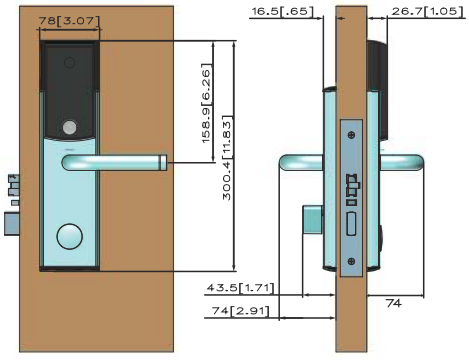

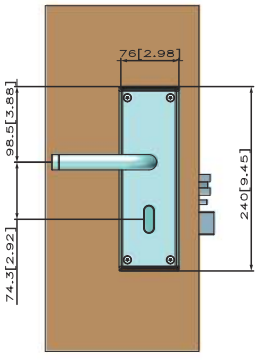

Features:

- **High mechanical reliability, built to last.**
- **Stainless steel construction, waterproof and weather-resistant for harsh environments.**
- **Rent and utility fee integration; access denied if unpaid.**
- **One-time passwords function allows new guest room tour without owner present.**
- **Online contract signing and payments for seamless transactions.**
- **Remote management: card deactivation, password updates, and lock control (gateway required).**
- **Multilingual support: Portuguese, English, French, Russian, Greek, Chinese.**
